DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Duennbier et al (DE 19506134, the applicant submitted prior art).

Duennbier et al (Fig.1) disclose a sensing circuit (3-4) for sensing an electrical charge stored in a capacitor element (C2) comprising a charge integrator circuit (4) arranged to receive an electrical charge from a capacitor element (C2), and a discriminator circuit (3) coupled in series with the charge integrator circuit, the discriminator circuit having a first input (E4) arranged to receive an output signal from the integrator circuit (4) and a second input arranged to receive a reference voltage signal (GND), wherein the discriminator circuit comprises a comparator circuit (2) and the capacitor element comprises an electrode for storing electrical charge (C2).

Allowable Subject Matter

3. Claims 10-21 are allowed.

4. Claims 2, 4-5, 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
